  - propagates to Ubuntu devel version – currently yakkety

Dependencies

- Recent new dependencies
  - sqlite
    - A standard package already installed on most systems
  - libs3
    - libs3 was not packaged for Fedora/EPEL – we did that
    - The S3 dependent component has been put in its own sub-package nordugrid-arc-plugins-s3
  - perl-Devel-NYTProf
    - Used by the performance monitoring. Was available in Fedora and Debian. When contacted the Fedora maintainer also created EPEL packages
